

Yuxin Zhang 0030173153

Best lambda tested is 13.4896288, which yield an MSE of 1811976.5702685.

According to the normalized input data and the trained module (see figure above), I got the result.

$Y(x)=5115.65x^8-201.4977x^7-207.154x^6-1338.291x^5+219.19x^4-66.364x^3+500.91x^2+74.306x-459.072$.

The predicted price is 164076. 635.
